Rules of the special competition "Best Breeding Pair"

A pair of cats (male and female) of the same breed (or of the breeds that can be used for breeding together) and which together form a harmonious and correct combination of male and female, with the assumption of high-quality offspring, can be entered into this class.
The male and female do not need to be from the same owner - similar to the case of mating - each owner can be different.

The breeding pair will not be judged during the day, but the selection of the most beautiful breeding pair will take place at the end of the day, before the BIS itself. All registered breeding pairs will be presented on stage so that visitors can see them on the stage and from among them the judges will choose the most beautiful breeding pair - the pair that is best suited to each other.

BUT, there are attractive prizes prepared for each registered breeding pair :)
